Basel, 8. June 2018

Agilent Microplates Exhibiting at MipTec 2018

Visit us at our Booth C34!

We hope to see you in the Bucher Biotec AG booth at MipTec 2018 in sunny Basel, September 12-14, 2018! Drop by booth C34 and say hello.

Agilent Microplates (formerly Seahorse Microplates), now fully integrated with Agilent Technologies, Inc., continues to set the industry standards for designing and manufacturing microplate products and customized solutions that meet the stringent needs of the life science community. Whether it is filter plates, assay/storage plates, or reagent reservoirs, Agilent Microplates offers an unmatched combination of experience, innovative technology, purchasing convenience, and comprehensive support to rapidly deliver products to exact specifications.

MipTec is focused on the needs of the life sciences community for which microplate technologies continue to expand the range of applications and accelerate data generation. Agilent's focus on quality and innovation generates a premier resource for optimization of assay results. To that end, Agilent has created a full line of irradiated products to provide the highest quality approaches to method development and data production. We look forward to presenting these new products to address the unique requirements of the MipTec community!

To learn more about the event, visit the MipTec 2018 website (www.basellife.org).
