Invitation to a live Webinar on

## Unlock the Value in Your FFPE Samples

### More nucleic acid with less hands-on time

Join us for a webinar with Klint Rose, Ph.D., CSO of Purigen Biosystems, where he will be discussing the many benefits of the Ionic® Purification System in extracting pure RNA and DNA from FFPE samples using isotachopheresis.

- **Higher Yield, Higher Quality and Better Data**  
3.5x more DNA and 2x more RNA from FFPE (on average)
- **No Beads, Columns, or Fixed Surfaces**  
Less fragmentation and no risk of contamination from beads or wash solvents
- **No Bias Towards Length or GC Content**  
Extract targeted nucleic acid regardless of fragment length or GC content
- **Efficient Workflow and Simple Lysis**  
Deparaffinize, lyse, and de-crosslink FFPE in a single reaction without using harsh chemicals

**Klint Rose, Ph.D.**  
CSO, Purigen Biosystems

Date / Time

**Thursday, 17 November**  
**4:00 PM CET**
